YESAB Yukon Environmental and Socio-economic Assessment Board

Does being a part of one of Canada's most dynamic environmental and socio-economic assessment processes interest you?

YESAB is an independent, arms-length body responsible for carrying out the assessment responsibilities under the Yukon Environmental and Socio-economic Assessment Act (YESAA). Our commitment is to be an impartial, effective and efficient organization that provides assistance to all involved in the assessment process.

WHITEHORSE OPPORTUNITY HUMAN RESOURCES MANAGER

Full-time, permanent

Annual salary range: \$90,689.16 - \$120,918.90

Located at Head Office, this position is responsible for leading the development, implementation and evaluation of human resource (HR) management policies, programs and practices that will provide an employee-oriented, high performance culture that emphasizes empowerment, respect, productivity, a commitment to excellence, cooperation, and positive values and will support the recruitment and ongoing development of a superior workforce. The HR Manager provides technical assistance to the YESAB management team, interprets and ensures compliance with HR policy and guidelines and applicable federal and territorial legislation. The HR Manager is also responsible for ensuring a strategic direction for HR programs within YESAB, developing and implementing HR policies and programs consistent with the strategy and assessing their effectiveness. The HR Manager advises the Executive Director on strategic organizational and HR issues.

MAYO OPPORTUNITY MANAGER, DESIGNATED OFFICE

Full-time, permanent

Annual salary range: \$86,238.79 - \$99,699.33

Located in Mayo, this position is responsible for managing the daily operations of the designated office. This position conducts and leads environmental and socio-economic assessment of projects within the designated area to identify environmental and socio-economic impacts while incorporating traditional knowledge of First Nations and local knowledge into assessments. This includes identifying project effects and mitigation measures for adverse effects, determining the significance of any residual effects and developing recommendations.

Should either of these exciting opportunities be of interest we'd like to hear from you. Submissions must clearly identify the relevant position title and office location, include both a cover letter and résumé and clearly outline how your background and experience make you the ideal candidate for the desired position.

Job descriptions are available at:

YESAB Head Office,
Suite 200 – 309 Strickland Street in Whitehorse
Mayo Designated Office, First Avenue in Mayo
or on our website at www.yesab.ca/employment

2018 Mosquito Control Program

Larval surveying and monitoring is scheduled to begin as early as 16 April 2018, depending on weather conditions. The goal of the annual control program is to reduce adult mosquito annoyance for residents and visitors. Experience from past programs has proven that the best way to achieve this is through effective control of larval mosquito populations.

Control of larval mosquito populations will be completed as required, and where necessary, throughout the season on the basis of mosquito population surveillance. Larvicide applications will be made using aerial (helicopter) and ground-based, hand-broadcast methods. Control program operations will extend throughout the summer and until mid-August.

Larval development occurs with water accumulations from snowmelt and precipitation in depressions and established ponds. Permanent water bodies include stagnant ponds, marshes, non-flowing ditches, depressions and any other natural or man-made containers, which can hold water for several weeks or months. Left unchecked, mosquito larvae will complete their development to adult and be of annoyance. For this reason, control program efforts are focused on the identification and treatment of developing mosquito larvae using the biological larvicide VectoBac 200G which contains the heat-killed bacterium, *Bacillus thuringiensis var. israelensis* (Bti). This bacterium is specific in its control of mosquitoes and biting flies. It does not reproduce in the environment and has no effect on non-target insects, fish birds or mammals, including humans, livestock and pets. All applications will be directed to infested mosquito development habitat located within, and adjacent to the City of Whitehorse.

Residents can reduce the likelihood of mosquito bites by eliminating mosquito development sources around their property and by using personal protection methods. Regular draining and refilling of wading pools, livestock watering troughs, tires, bird baths and emptying of tarped boats, canoes or wheelbarrows reduce sources of potential mosquito development. Filling of depressions such as tire ruts, borrow pits and excavations prevents water accumulations and the creation of larval mosquito habitat.

While the larval mosquito control program will reduce overall mosquito populations, residents and visitors should still be prepared to protect themselves from adult mosquitos. Ensure window screens are in good condition, and wear loose, light coloured clothing. Be aware of outdoor activities near landscaped areas, marshes, ponds, lake margins and forested or overgrown areas where adult mosquitos may rest; as well as using perfumed skin care products, shampoos and consider using repellents.

The firm responsible for managing control program operations is Duka Environmental Services Ltd., an environmental services firm with over 25 years of providing these specialized services to the Yukon. All mosquito larvicide applications would be completed under the approved conditions of Pesticide Use/Service Permit # 21-004. For more information on mosquitos, the control program or VectoBac 200G please visit www.duka.consulting or www.valentbiosciences.com. You can also leave a message for the mosquito control program biologist at City of Whitehorse offices, locally through the 'BITE' line 633-BITE (2483), or directly with Duka Ltd. at 1-604-881-4565 or at 1-800-681-3472. Biologists will follow up with a telephone call and on-site property inspection where required.

**TIPS ON HOW TO WRITE A CLASSIFIED AD THAT SELLS**

1. Use a **KEYWORD**. This immediately tells the reader exactly what it is you have to sell.
2. Make your description **CLEAR** and **FACTUAL**. State the year, make, model, color, size and tell what condition the item is. Also state the special features.
3. State the **PRICE**. Successful Classified advertisers have learned that the price in an ad helps increase the chances for results.
4. If there's a genuine sense of **URGENCY**, say so. The words, "We're Moving" or "Must Sell Fast" suggests that readers respond immediately.
5. Include your **PHONE NUMBER**. Classifieds get results fast and often generate immediate sales. If you cannot be available to answer the phone at all times, be sure to specify special calling times such as "after 6PM" or "before 11AM".

If you need assistance ask one of our friendly AD-VISORS to help you word your ad.
