### THE 'DISCOVERY WELL'

Little was it thought when the original "Discovery Well" was drilled in 1928 in the Fort Norman area that, through the exigencies of war, the oil that flowed from there would be piped to Whitehorse, a distance of 595 miles, and refined here. The transportation of men and equipment over a road more than a thousand miles long was one of the major obstacles encountered and overcome. Camps, warehouses and platforms were constructed and pre-fabricated, barges, tugs assembled and Camp Canol was established.

In June 1942 the U.S. Engineer troops arrived in Waterways, a small frontier town northeast of Edmonton, and the men of the navigation system in Norman Wells on the Mackenzie River. By the summer of 1943 the water system had been well established, in the meantime another route from Dawson Creek, B.C. to Whitehorse on the Alaska Highway had been opened. This pioneer road was completed in November 1942 and converted into an all-weather military highway by October 1943.

As the transportation systems came into operation crews started from Whitehorse and Norman Wells to construct the Canol access road at both ends. This road was completed in December 31, 1943 and in the following February (1944) the first weld was made in the 595-mile pipeline. On April 30, 1944 the official opening of the refinery was fittingly commemorated.

### 1901 News from the Whitehorse Star

#### Work To Be Resumed

**On The Anaconda, Rabbit Foot and White Horse Group  
Mines For Which Large Sums Have Been  
Offered and Refused**

The excellent returns from Messrs. Graingers & McIntyre's properties has given a fresh impetus to copper mining in the White Horse district, and in the course of the next two or three weeks a force of men will be put to work on the Anaconda mine, which has already had sufficient development done to prove it equally rich as the Copper King.

The group of mines comprising the Anaconda, Rabbit Foot and White Horse, is owned by Messrs. J.P. Whitney, A. P. Benton, Ole Dickson, W.A. Pucket, Charley Ward and O'Neil. Of these the Anaconda is the furthest advanced in development, 135 feet of tunnel having already been run, besides numerous cross-cuts and several shafts to a depth of 20 feet.

Last June \$100,000 was offered and refused for the Anaconda and five weeks ago an offer of \$150,000 for the Anaconda and Rabbit Foot was also declined.

The lode on which these claims are located shows an average width of 75 feet, and assays from picked ore have given values as high as \$258 per ton.

At the Anaconda there are now about 100 tons of ore on the dump, but the owners have decided not to ship any of it at present, and will wait for the erection of a smelter close at hand which has every indication of being an accomplished fact during the coming summer.
